

Iowa State Instructor Tip:

Pay close attention to the “Test Results and Feedback” section.

With just a few settings in this panel, instructors are able to control student access to sensitive test information, including questions, answers, scores, and student feedback.

1. The instructor can select up to two timing rules to trigger the release of information through the “My Grades” tool and test confirmation screen. Other settings specify what information will be released:
2. Check to enable students to see each question and the score for each question.
3. Check to enable students to see each question and all possible answers.
4. Check to enable students to see each question and the correct answers.
5. Check to enable students to see each question and their submitted answers.
6. Check to enable students to see question-specific feedback material, if any has been provided by the instructor.
7. Check to enable students to see which questions were answered incorrectly.

Related notes on information release:

- For tests that are auto-graded, students will see their total score once, upon submission.
- Students can see their total score in the “My Grades” tool, unless the column is hidden by the instructor.

Used effectively, these features can provide a valuable pedagogical tool. Improper use, however, may lead to unintended student access to test information. Instructors are encouraged to seek [more help](#), as needed, and to test their exam deployment fully.
